Ahorro de energía eléctrica

Electric utility cost of ELECYLINDER® is only 0.9 cents per day (8 hours).*
It contributes to the reduction of CO2 in the factory.

(*1) MECHATROLINK I/II is treated as an intelligent I/O, and supports only non-synchronous communication. MECHATROLINK III is compatible with the standard ServoProfile.
(*2) When it is operated by movement by specifying direct values, the number of positioning points is unlimited.
(*3) Able to cope with EtherNet (TCP/IP: message communication) when switching the parameters for EtherNet/IP.
(*4) It corresponds to Ethernet (TCP/IP: message communication) only for standard Ethernet.
