*Controller is not included.

* CE marking is an option.

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please contact for more information regarding mounting positions.

The figure above is the motor side-mounted to the left (ML).

- POINT**
Note on selection
- (1) When the stroke is increased, the maximum speed will drop to prevent reaching a critical rotational speed of the ball screw. Please confirm the maximum speed for the desired stroke in the actuator specifications table below.
 - (2) The payload assumes operation at an acceleration of 0.3G (0.2G for lead 4). This is the upper limit of the acceleration.
 - (3) Please refer to our website for more information about push-motion operation.
